TurnItIn is available to faculty and is embedded in Canvas assignments for your students. Would you like to learn more? Registered for one of the training sessions being offered by the vendor, TurnItIn.

Join us to review a framework for using the Turnitin AI Indicator in your university. This session will review:

- What the AI Indicator could be telling us about student writing.
- A demonstration of how the AI Indicator works with a sample of student papers.
- Information about how the reliability score is generated.
- Answers to frequently asked questions.

AI-assisted writing tools such as ChatGPT are a hot topic in academia right now. During this session, we will discuss what Turnitin has been doing to develop tools to help instructors and students, as well as the unique opportunities and challenges this time period poses.
This session will offer a chance for Q&A, along with a chance to discuss with colleagues from across the Maricopa community.

- How can we prepare our students for the world of tomorrow?
- How do we approach encouraging right usage of AI tools?

Registering is one of the only ways to receive a link to the archived session, so please be sure you register, even if you cannot attend.

**REGISTER HERE**

Available Session Dates & Times:

- 8-15: 3:00 pm
- 8-16: 10:00 am
- 8-22: 10:00 am
- 8-24: 2:00 pm
- 8-25: 1:00 pm

In advance of the session, you will find the materials below helpful to pre-read (they will be included in your confirmation email).

- **AI terms & education: A glossary of what you need to know**
- **Academic integrity in the age of AI: Educator Resources**
We are excited to invite you to our monthly webinar series on Generative AI. These webinars are designed to keep you up-to-date with the latest developments in AI technology and its applications in the classroom.

This monthly series will highlight what is new with generative AI and also highlight some amazing work that is coming from faculty, administration, and institutions as they navigate this new and rapidly changing technology. Our rotating panelists – experts in education and technology – will provide insight and advice during a dedicated Q&A.

Panelists:
- Rufus Glasper, President and Chief Executive Officer – The League for Innovation in the Community College
- Kelsey Behringer, Chief Executive Officer – Packback

CHATGPT: HOW TO CREATE AI LESSONS

Join us for an innovative workshop exploring the exciting intersection of education and artificial intelligence.

This workshop is designed for educators across all levels and disciplines, equipping them with the tools to teach their students about generative AI, specifically as it relates to your discipline.

Over half of our students are using generative AI. It is imperative we teach our students how to appropriately and ethically use generative AI. After all, we’re teachers!

Speakers
- Kelsey Behringer, Chief Executive Officer – Packback
- Ri Cantlin, Curriculum Consultant – Packback
- Cynthia Wilson, Vice President for Learning and Chief Impact Officer – The League of Innovation in the Community College
